Interoperability validation shall be confirmed by Thales in writing and shall only apply to the particular programs and/or products that were tested in accordance with the Solution Development Plan.

1.2.2 If, subsequent to achieving interoperability validation with respect to a product, Partner issues a new release of that product which incorporates new features and/or functionality prompting Partner to assign a new name or new release number (as commonly signified by a change in the numeral to the left of the decimal point in the product version number, or other similar designation)
